## EXPERIENCE

July 2013 to June 2017 Deer & Wildlife Manager Mesquite Creek Ranch LLC Lampasas, TX

Oversaw daily operations of pen adult and fawn whitetail deer including feeding, medical evaluations, and treatment (tagging, vaccinations, darting, and recordkeeping). Other duties: facility improvement and maintenance including fence repair, vehicle maintenance, light plumbing, and light carpentry. Pasture improvement and maintenance, feeding, census taking, food plot design, and predator control.

Summer 2012 Ranch Worker Zachry Construction Corp. at Rocky Crest Ranch Medina, TX

Daily operation experience included but not limited to whitetail fawn tagging and care, adult whitetail nutrition and care, predator control and facility maintenance.

2009 to 2011 President/Consultant/Manager KBM Texas Ranch Services LLC Austin, TX

Demonstrated small team leadership in an organizational environment by managing KBM Texas Ranch Services LLC. Developed and implemented strategy and market research to improve habitat, increase efficiency and profit for farm, ranch and wildlife clients. Small acreage soil testing, forage and crop growing experience. Provided follow up comments, concepts and continually updated meaningful summaries of changing agriculture and food related news through research and experience.

2007 to 2009 Student/Ranch Worker Freeman Ranch San Marcos, TX

While earning Bachelors Degree in Agriculture, participated in daily operations at the Freeman Ranch, a 4,500 acre working ranch as well as an educational facility held in trust by Texas State University in San Marcos, Texas. Participated in hunting and client relationship building by assisting in strategic needs identification of industry clients. Participated in natural resources monitoring program activities by making observations, gathering data, and reporting findings where information was used in environmental assessments. Collected data and participated in experiments, studies, and investigations in wildlife and cattle management concerned with living organisms, their distribution, characteristics, life processes, and adaptations and relations to the environment. Cattle experience skills included shots, dehorning, castrating, sorting, and feeding. Experienced in machinery maintenance, herbicide spraying, brush and tree clearing with chain saw, fence building, cutting torch, barn and home repair and maintenance.
